Mentoring Information System
(Mentoris)

Hadyan Abdul Aziz

Junior Developer at PT. Indosat Tbk | Information System
West Java, Indonesia

Summary

I graduated with a bachelor's degree in information system from Sekolah Tinggi Teknologi Terpadu Nurul Fikri in March 2023, where I gained experience in various programming languages and tools, with a focus on frontend development. During my studies, I completed several projects using React, including a responsive e-commerce website and a comprehensive bank operating system for Sharia banking institutions. I also developed a custom content management system for a client using Laravel. I am passionate about learning and growing in the field of frontend development, and I am constantly seeking out new challenges and opportunities to expand my skills. I have a particular interest in React, and I have completed multiple certifications and courses related to this framework. I also have skills in Figma, a software for designing user interfaces, and SQL, a language for managing databases.

Experience
